

## APS-BOT

The APS-Bot helps to disinfect surrounding air and surfaces against harmful germs, viruses and bacteria. The device has safety features such as a remote control and motion detector.

It is mobile on wheels enabling you to move it to any desired location. The germicidal UVC lamps can be positioned and angled (0-180°) in multiple ways. This provides 360° effective disinfection in any environments and spaces.

### General Information

Stainless steel structure
360° angle disinfection
Strong wheels for transport
Up to 50 m2 disinfection surface
Disinfection time settable
Schuko Plug – 10 meter cable
Motion detector
Remote control
Sonar buzzer
Lamps position adjustable (0-180°)

### Applications:

Healthcare

Hospitality

Living Spaces

Schools

Factories

Offices
