

APS-WAND

The APS-WAND is a handheld UV device that can kill 99.9% of harmful germs and viruses including COVID-19. It is lightweight and portable, enabling you to easily move it around to disinfect any desired object or surface. This provides effective cleaning for any environment, including frequently touched objects or spaces.

The APS-WAND range consists of a reflective stainless-steel structure that houses a UV disinfection lamp inside and is available in 2 different sizes.

The Key Benefits:

- Cost-effective
- User friendly
- Portable disinfection
- Chemical-free
- Prevents cross-contamination
- Achieves high hygiene standards
- Easily maintained
